SUMMARY

Motivated HNDIT undergraduate at the Sri Lanka Institute of Advanced Technological Studies (SLIATE) with a strong foundation in Software Engineering, Full-Stack Web Development, Quality Assurance (SQA), and Data Analytics. Hands-on experience in building web and mobile applications using PHP, Laravel, React, Flutter, and MySQL, alongside executing software testing methodologies and database querying. Eager to leverage technical problem-solving skills in a dynamic internship role across development, QA, or data-driven environments.

ACADEMIC PROJECTS

Laptop Shop Management & E-Commerce System – *Multi-Role E-Commerce & POS Web Application* (MAR 2026 – JUN 2026)

Laravel, PHP, MySQL, JavaScript, HTML5, Tailwind CSS, Bootstrap, Git, XAMPP.

- **Architected a full-stack Laravel e-commerce platform** with Role-Based Access Control (RBAC) for Admins, Staff, and Customers, integrating custom revenue tracking logic that instantly counts Card sales while deferring COD until delivery.
- **Engineered dynamic order and inventory workflows** featuring live stock reduction, automated invoicing, and dual-layer client/server data validations (oninput regex & Laravel) to ensure strict system data integrity.

Student Management System (JAN 2026 – FEB 2026)

PHP, MySQL, Bootstrap, HTML5, CSS3, XAMPP

- Developed a web-based **Student Management System** with complete CRUD functionality for managing student records, including adding, viewing, updating, and deleting student information.
- Implemented **session-based authentication and login protection** with a responsive, modern **Bootstrap-based UI** for secure and user-friendly student management.

MediMart — Pharmacy Management System (JAN 2026 – FEB 2026)

Java, Java Swing, MySQL, JDBC, OOP, Xamp, MVC

- **Developed a Java-based Pharmacy Management System** using **MVC architecture** with role-based access for Managers and Assistants, supporting product management and secure user authentication.
- **Implemented product inventory workflows** with CRUD operations, category-based product management, database integration through **JDBC**, and role-based restrictions on Update/Delete operations.

Explore Sri Lanka — Zone-Based Tourism Discovery Web Application (JUL 2026 - Sep 2026)

React.js, Tailwind CSS, PHP, MySQL, PDO, Vite, React Router, RESTful APIs

- **Architected a full-stack tourism platform** with a normalized MySQL schema (zones, places, gallery images) exposed through a clean, Laravel-ready PHP REST API using PDO prepared statements across five documented JSON endpoints.
- **Built a dynamic, zone-based React frontend** with React Router, an interactive SVG hotspot map, a reusable Tailwind component library, and skeleton-loading states for a smooth, mobile-responsive UX.
